

Mr. Omar Sweeney

A senior executive with over twenty (20) years of diverse corporate and organizational experience and technical expertise in areas related to the financial, economic development, project management and power utilities. Mr. Sweeney's experience complements his ability to manage organizational risks due to extensive knowledge of development issues, government policies and corporate strategies.

An engineer by profession, he is a past president and current corporate member of the Jamaica Institute of Engineers (JIE), and is their representative on the NSWMA Board of Directors. Mr. Sweeney is currently the Managing Director at Jamaica Social Investment Fund (JSIF) and is also a lecturer in Civil and Construction Engineering at the Masters level.

An esteemed negotiator, with extensive and in-depth knowledge and hands-on experience as a Project Engineer and Project Manager for major infrastructure design development, construction, surveying, planning and spatial analysis. Mr. Sweeney also has experience working in the private sector, at his last employment; he was responsible for 65% of total revenue and 38% of customer base for the company.

Mr. Sweeney sits on other boards and committee and is a member of the Project Management Institute (PMI), Project Management Professional (PMP) and has published articles in periodicals, newsletters and newspapers and also in the Canadian Society of Civil Engineers. He has worked in Jamaica and the USA where he led and worked on projects totaling over US\$737.5M and has presented papers on Infrastructure Development and has attended and represented Jamaica in several conferences and study tours overseas.
